ABOUT ME

I am currently a student pursuing a degree in Information Technology Engineering (ITE) with a strong passion for technology and software development. I am an open-minded and eager learner, always looking to expand my knowledge and skills. I am particularly interested in how effective communication strategies can help solve complex development challenges. I am seeking my first opportunity in a dynamic and supportive environment where I can learn, grow, and contribute as a developer.

Project

- Developed a C++ application for student birthday list (Crud) -year1
